Each search Field by itself allows you to search on individual values. The more you type into the search field the more you filter through the dealer listing to find your exact match. In the next section you will see the advantage of using the fields in combination with each other.

Combining fields to create a search criteria.

Suppose you don't know the full dealership name, but you do know that the dealership name contains the word "Auto" and you know that the Zip Code is "22801". The below image shows the results of using the search fields in combination.

Dealership: Auto **Address:** Address **City:** City **Zipcode:** 22801 |

Search:

Dealership ▲	Address ▲	City ▲	Zipcode ▲	DealerOperator ▲	Details ▲
BOB WADE AUTO WORLD	3005 S MAIN STREET	HARRISONBURG	22801	ROBERT WADE	More details

The search values used in combination allow you to filter through all the dealers until you are able to get the results you want. Just be aware that the more fields you use in combination will help you refine your results but may lead to displaying no records at all.

Using the global “Search” field

The global search field located just above the right side of the dealer list shown in the image below.

For example if you are going to search on a salesperson who's name is "Jeffrey" it may not be visible to you in the list but once you click on More details it will be revealed in the details of the dealership.

You will see in the next image that Jeffrey is a salesperson in the dealership:
